Dear Mr. Sough:

I received a voicemail message today regarding 09/940,450 and have asked Roger Wylie to contact you tomorrow to discuss.

We recently completed a review of the PAIR system records and the associated internet file wrappers for our active applications. We have ordered certified copies of the file history for each of the applications (six in total) that appear to be missing at least one amendment.

Anything that you can do to expedite the delivery of the requested file histories will be greatly appreciated. Thank you for your time and attention.

P.S.

Richard Dodson is the designated phone contact for 09/940,450 (see attachment)
